DETAILED ACTION

Claim Objections

1. Claims 46, 47 49 and 50 are objected to because claims 46 and 47 are the same as claims 49 and 50, respectively. Appropriate correction is required.

Claim Rejections - 35 USC § 112

2. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

3. Claims 36, 37, 39, 40, 43, 44, 46, 47 and 49-52 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

4. Regarding claims 36, 39, 43, 46 and 49, lines 3 and 4, i.e., "an indicator is in said at least one spiral groove be being in each..." as recited render the claims indefinite because, in addition to double inclusion (said indicator, instead of another indicator), it is unclear what is being claimed, is applicant claiming each of said plural spiral grooves to have an indicator at a bottom thereof?

Claim Rejections - 35 USC § 102

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

Art Unit: 3723

2. Claims 33-52 (as best understood) are rejected under 35 U.S.C. 102(e) as anticipated by Chen et al. (6,656,019).

Chen et al. discloses all the limitations of the above claims, i.e., a polishing apparatus comprising a polishing member having a polishing surface that has at least one spiral groove therein; a substrate holder adapted to hold a substrate and press the substrate against said polishing surface; and an indicator in said at least one spiral groove (10:24-26), the polishing apparatus further comprising a polishing table, with said polishing member being attached to said polishing table; wherein said indicator has a color that is different than a color of said polishing member (10:21); wherein said at least one spiral groove comprises plural spiral grooves, and an indicator may be in any groove, considered to meet the limitation as best understood. (New) The polishing apparatus according to claim 36, wherein said indicator is for allowing to be observed an extent to which said polishing member is worn.

Claim Rejections - 35 USC § 103

3. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

4. Claims 36, 37, 39, 40, 43, 44, 46, 47 and 49-52 are in the alternative, rejected under 35 U.S.C. 103(a) as being unpatentable over Chen et al.

Art Unit: 3723

Chen meets all the limitations of the above claims, even though "any of the grooves" as disclosed in col. 10, line 24, is considered to meet the limitations of the above claims under 35 USC 102(e), it is noted that it would have been obvious to one of ordinary skill in the art, at the time the invention was made, to modify the invention of Chen et al. by placing the indicator in each and every groove to ensure the indication to change the pad, and further since it has been held that mere duplication of the essential working parts of a device involves only routine skill in the art. *St. Regis Paper Co. v. Bemis Co.*, 193 USPQ 8.

Conclusion

5. Prior art made of record and not relied upon are considered pertinent to applicant's disclosure. Robinson et al., Raeder et al. and Cheek et al. are cited to show related inventions.
